

Nero Tutorial

Making a Data Disk

Compiled by Jennifer Elliot, Gayle Zaring, and Kathy Overstreet

Decide first to burn DVD or CD (CD-700MB, DVD 4500MB)

Get files on server that you might want to burn and save them to the desktop before you begin the process of adding files to burn list. Nero will not let you add files from the server.

Open SmartStart by double clicking the Nero SmartStart icon on the desktop (If the SmartStart icon is not on the desktop, you can find it under Programs, Nero, and Nero SmartStart).

Go to right hand corner of the SmartStart window and click the DVD or CD icon.

nero

DVD

CD

Welcome to Nero!

First, select your disc type
(CD or DVD)

Then choose your category

Pick a task

And click to get started

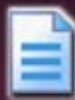

Float over the icons across the top of the Nero SmartStart screen to see what options are available.

Stop at **Data** icon.

Click '**Make a data disk**' (this icon looks like a sheet of paper) to make a data disk (screen will disappear, but don't panic - the burning window will appear!)

nero

DVD CD

Data

Make Data Disc

On the right hand side of the screen click the **ADD** button. Allows you to browse for files you want (Browse to wherever they're at).

Nero Express

Play

Total space used:

0.0 MB

Pick files you want from the browse dialog box and click add. You can go back and add as many files as your DVD will hold.

Once you've found all you want, click **Finish**. It will close the browsing dialog box. If you discover that you have added a file you do not want burned as part of this project, you can select it and use the delete button to remove it from the list. If you discover that you forgot to add a file, you can select add to browse for it.

All Files (*.*)

Add

Finished

When your list is finished, click next. In the lower left hand side corner of the window above the word **Next** you can see how much space this burn will use.

*If you are burning a DVD, you can subtract the current file size from 4.7 G or 4500 MB.

Drop the **Current Recorder** list down and select the '**F: Sony**' drive. In the text box to the right of **Disc Name** give your DVD a meaningful name (i.e. NISOD Interview Video)

*This is the name you will see when you put the DVD in your computer.

Click the word **Burn** in the lower right-hand corner of the screen. If you haven't put in your disc yet, the computer will ask for it.

Nero Express

Final Burn Settings

Click 'Burn' to start the recording process.

Back

Burn

A warning may pop up. Click 'burn anyway' and the burning process will begin.

DO NOT do anything on the machine while it's burning.

When the burn process is done, click **Next** to finish the burn. Nero will kick the disc out. Make sure to let Nero finish the burn and don't eject the disk yourself. Click **Exit** to close the Nero Burn Window.

If you need to burn a CD, you can use these same instructions to do so, just select the CD option instead of the DVD one (See SmartStart opening screenshot).

Feel free to contact Jennifer Elliott or Kathy Overstreet for help with these instructions or if you need additional assistance with a different aspect of Nero.
