## Blood drive Feb. 4

The LTC Health Careers Club will sponsor a Red Cross Blood Drive from 9 a.m. to 1 p.m. Feb. 4 in the gym.

Every two seconds, someone in the United States needs a blood transfusion. All blood types are currently needed – especially O positive, O negative, B negative and A negative in order to meet patient demand. Type O negative is the universal blood type and can be transfused to anyone who needs blood. It's the blood type doctors turn to first in an emergency situation when there is no time to match a patient's blood type.

A blood donor card or driver's license, or two other forms of identification are required at check-in. Individuals who are 17 years of age, weigh at least 110 pounds and are in generally good health may be eligible to donate blood. High school students and other donors 18 years of age and younger also must meet certain height and weight requirements.
